New ideas about the transmission of ultra-low-level signals with a very high resolution were the design parameters of our 2.9 mm diameter thin triaxial interconnect. With Linear Structured Carbon doped insulators and Tunnel Technology we achieve beside a good protection against environmental effects also a very low microphony. The Orchid is ideal as interconnect, internal wiring for equipment and as a studio musical instruments cable. The Orchid is in balanced and unbalanced terminated version available. Not available on reels due to complex mounting.

Analog interconnects, balanced

The CNT > Halogen Free < Made in E.U. - Limited Edition

Our latest contribution to the always interesting world of recording and replay is our Carbon Nano Tube based interconnect: The CNT. Carbon Nano Tube is the most advanced conductor material at the moment available and exclusively used in our The CNT. **We are proud to announce that we are the first company worldwide to have a high-tech & commercial application of this very advanced type of carbon.** The sound quality is unsurpassed with all the properties an audiophile could dream about, like a very spacious, very dynamic and very transparent sound without any harshness. Listening gives you the feeling you are in front of the real sound-stage.

Comes with silver plated Neutrik XLR balanced connectors. Packed in a beautiful aluminium wallet.

The Platinum Hybrid Mk II Balanced > Halogen Free < Made in E.U. - Limited Edition

Very limited-edition high quality balanced interconnect with extremely purified **platinum(!)** signal conductors with improved platinum coloured HULLIFLEX(*) High Density jacket. With our vast knowledge on metal technology we have started by calculating the ideal specifications of the conductors and matched the type of metal that possessed these numbers. It turned out that two 0.3 mm solid core pure platinum conductors were right on the dot. The impedance between two natural conductors is a very precise 110Ω. The result is thus not only a very attractive looking cable but also probably the best metal based balanced interconnect on the market today. After our very successful introduction of the Platinum Hybrid MK I, we have been looking at any possible improvement, which we realised in a lower capacitance conductor with an improved thicker jacket. Comes with rhodium plated C - 11.3 (RCA) or silver plated Neutrik XLR balanced connectors. Packed in a beautiful aluminium wallet.

3. Subwoofer cables

The MINI Sub Hybrid > Halogen Free < Made in E.U.

The MINI SUB Hybrid typically has been designed as an active subwoofer cable. It is extremely flexible, and has an attractive cream coloured jacket that blends easily in any interior, making it very suitable for longer length subwoofer cable applications and all other interconnections where there is need for a very flexible, price-efficient cable. Available as a single lead. Comes with gold plated C – 5.5 (RCA) or silver plated Neutrik XLR balanced connectors.

5.2 Coaxial interlinks

Stereo pair 3T The River Hybrid > Halogen Free < Made in E.U.

Our coaxial entry level interconnect model with both centre core and shielding made of 3T conductors. The centre conductor is made of 19 strands of 150-micron diameter each. In combination with the extra L.S.C. layer around the centre core, we have applied two very innovative technologies together to open doors to the highest quality in musical experiences.

The shielding is made of 40 3T strands combined with 2 layers of multiple heavy silver coated high quality copper strands. Our exclusive 3T technology gives a much higher resolution and richer detail, compared to any other metal technology used so far.

With rhodium plated C - 7.3 (RCA) connectors.

Our second 3T coaxial interconnect with technical upgrades compared to the 3T River Hybrid. The single Hybrid centre conductor is made of a thicker 3T single strand conductor with 400-micron diameter and coated with an L.S.C. layer to improve the signal quality. The shielding has beside 40 3T strands 2 layers of multiple heavy silver coated high quality copper strands.

The dynamic sound character combined with the very high resolution will be a very big surprise to you.

All our combined and innovative 3T technology contributes to a very natural sound reproduction never experienced before.

The Name Antenna > Halogen Free < Made in E.U.

With all technical improvements over the years to upgrade the video and image quality at home, it is essential that the connection between the antenna and the rest of the AV system has a very high quality to avoid signal losses.

This means a wide frequency range, a very low internal loss and a characteristic impedance matching exactly 75 Ohm. You find all this in our The NAME Antenna cable for a budget price, including two VDH custom made exact 75 Ohm connectors. Not available on reel.

Mounted 3T loudspeaker cable

Mounted set 3T The Cloud SE > Halogen Free < Made in E.U.

This gold coloured HULLIFLEX insulated loudspeaker cable is made of 4 x AWG08 groups of 3T strands. Each group is made of 6 x 7 strands with each strand a diameter of 0.34mm: combined a size of AWG-8. Thanks to the heavy 3T construction, you will enjoy a fabulous sound quality. The same as we did when the first run of the 3T The Cloud arrived here and performed very well (and even without running in) in our in-house test-system after six hours of mounting work. 4 Lead speaker stereo wiring set terminated with rhodium plated BERRI Bus Connectors.

12. Industrial cable products

Unless otherwise is stated, price is per meter or per unit.

12.1. Internal wiring based on Fusion technology

All FT cables are available in both red and/or black.

FT - 18 > Halogen Free < Made in E.U.

The FT - 18 is an 18 gauge cable with 24 strands with our own Fusion Technology conductors: an amorphous alloy of Copper, Zinc and Silver. Especially designed for internal wiring of loudspeaker cabinets, amplifiers and as general purpose wiring in high quality equipment.

FT - 16 > Halogen Free < Made in E.U.

The FT - 16 is a 16 gauge cable with 63 strands cable with our own fusion based technology conductors. Especially designed for internal wiring of loudspeaker cabinets, amplifiers and as general purpose wiring in high quality equipment. The 63 strands give this cable a high flexibility; very helpful in difficult mounting situations. Its 63 strands are made of Fusion material.

FT - 12 > Halogen Free < Made in E.U.

The FT - 12 is a 12 gauge 147 strand cable with our own fusion based technology conductors. Especially designed for industrial purposes. Its extreme flexibility compared to the regular available 12 gauge constructions is a great advantage in many applications. The FT - 12 has been specially designed for use in high current applications in difficult situations like narrow spaced loudspeaker enclosures and power lines in mixing consoles and amplifiers. Sonically a very superior conductor: very smooth and detailed.

13.1. Power conditioners

The Black Hole > Made in E.U. < The van den Hul Black Hole is an innovative and advanced four outlet passive mains filter, which core design is based on entirely new technology and concepts. It provides high-end audio, video and mixed setups with perfectly clean mains power, can handle up to 1800 Watt total connected load and is equipped with four individually noise-insulated outlets.	
Price per unit.	19,240.00
The White Dwarf > Made in E.U. < The WHITE DWARF is a small though sophisticated single outlet mains filter specially intended for (low power) A/V equipment with a current consumption of up to 2 Amperes. It removes mains noise. Using a WHITE DWARF in front of each device in your A/V setup provides markedly improved transparency, definition, detail and dynamics.

13.2. The Extender

The Extender > Made in E.U. < The creation of The Extender was based on the search to find this "lost" live experience in any sound reproduction. However, The Extender produces no sound-field, is therefore literary no super-tweeter. You cannot measure or hear any sound coming from The Extender.

13.4. Amplifier electronics

The Emerald pre-amplifier > Made in E.U. < The Emerald balanced preamplifier is the next logic step after the introduction of The Grail SB. We have used the same design ideas from our Grail SB, a remote control is part of the design and the housing is made of thick steel. Specifically, the very natural and specific spacious sound is a benchmark of The Emerald. The very high resolution in combination with the natural dynamics in replay is another remarkable property.

14. Miscellaneous

<p>The Link Many amplifiers and A/V Receivers are equipped with a separate pre- and power amplifier part because of the extra opportunities such a separation offers, such as connecting a subwoofer or extra amplifiers. Connect those parts with The Link and you will immediately hear sound improvement. The sound reproduction will spectacularly gain air, detail and dynamic. Length 15 cm, colour red. Terminated with 4 gold-plated C-4.0 (RCA) connectors.</p>

<p>The Lower Friction Oil (TLF II) - Made in E.U. This is the heavy duty version from our previous TLF I. Your turntable and all other rotating components need a perfect oil to maintain a high reliability. Our TLF II is the right oil for this demanding job: no oxidation, very low surface tension (1/4 of water), very strong binding with the underlying surface and ultra-thin coating (just nanometres thick). As a general purpose low friction lubricant TLF II is most suited. Supplied in a 25cc bottle with brush.</p>

<p>Pss Pss reconditioning spray – Made in E.U. Aerosol contained spray which cleans oxidized contacts and also loosens and removes the film that is often composed by microscopic particles which have been transported by the polluted air surrounding the equipment or objects. The spray not only cleans but also protects the cleaned parts afterwards. <i>Only available for shipment by truck due to security regulations.</i> Packed and shipped in boxes containing 12 spray cans.</p>	
Price per 12 spray cans.	129.00
<p>Lead-free Silver Solder - Made in E.U. The strict order in the EU to work without any lead containing solder for environmental reasons combined with our ideas about improved metal technology are the basis for this product: the Sn95 / Ag4 Lead free Silver Solder. Direct sound quality comparisons between the two types of solder showed immediately the higher quality of our Lead-Free Silver Solder. The actual silver content is 4.5%.</p>

15. CD recordings

In March 1999 we introduced our Van den Hul® Carbon Recordings label aimed at providing high resolution reference quality recordings of great music; Recordings using a very natural and minimal recording approach and made with the very best equipment available, including our Linear Structured Carbon® cables for all connections. All CD's have been recorded live to two-track using DCS 96kHz/24-bit technology and form excellent reference and demonstration material.

Four of a kind: For the time being This CD is recorded in cooperation with two musicians from Italy: Dado Moroni - piano and Rosario Bonacorso - contrabass. This resulted in a full swing of sound, where especially the numbers Poinciana, Monty's Wave and Lime House Blues are outstanding samples of a perfect balance between the music and the acoustics with a lot of detail. Order code: VDH99CR01	
Jeroen de Rijk & friends: Central Heating The purpose of this CD was to record the balance in music and acoustics between Jeroen de Rijk - Percussionist and ten of his best friends, each of them performing on another instrument. Especially the performance of the numbers Masquerade, Self-portrait and Tarmac are perfect examples of a good balance between music and acoustics. They can be used as excellent demo numbers for critical listeners to evaluate their hi-fi system. Order code: VDH99CR02	
Louis van Dijk: Family & Friends A recording made in cooperation with Louis van Dijk and Selma van Dijk. Father Louis supports daughter Selma in a large variety of styles and numbers like the very delicate Sweet William and Burjazzque. Music for the dedicated and for the technical listeners. Frits Landesbergen Big Band: The Old Fashioned Way

A nice spacious, good harmony and great sounding big band with surprising instrument combinations. A lot of playing experience is captured here. For sure you will like the sound because it reminds also to the 60's and the 70's. The sound is too good to let it just fade out and disappear.

Serena: Dances of the Dolls

Music for children can be of two kinds. It may be intended for children to play or for children to hear. Both kinds of music are characterized generally by brevity and ease of comprehension, and often by characteristic titles related to fairy-tale or songs. This cd offers old and new examples of this tradition, performed by Serena Wang, the most conspicuous music prodigy under the direct tutorship of well-known and highly respected piano teacher Professor Dan Zhao Yi.

1.6. The Crimson series

Just when you think "It doesn't get any better..." The Crimson is a top performance custom hand built moving coil phono cartridge.

A crossbreed of our The Canary and The Condor. This cartridge is available in natural light and dark wood colour as well as in a red coloured (also wooden) version. On special request a Polycarbonate body is available. Specific characteristics for this great cartridge are a relatively high (0.95mV) output, gold coils, a Samarium-Cobalt magnet, extended channel separation and superb tracking ability.

As the popularity of vinyl is reviving again, many requests came in to develop a high-end phono cartridge for a more affordable price than The Colibri. The Crimson is the result and probably one of the cartridges with the

best value for money available. It is completely hand build by the Master himself and comes with a 250-300 hour service check-up, free of charge (for the original owner).

1.7. The Colibri series

Top model, featuring matched crystal copper coils and 0.22 mV at 5.6 cm/sec output. By minimising the total magnetic circuit the Weisz-domain modulation (magnetic) distortion has undergone a considerable decrease. No front pole. Very short 3 mm solid Boron cantilever.

The Colibri Master Signature is the culmination of A.J. van den Hul's 44 years of phono cartridge research and development. Due to a new magnetic structure, this is the highest output Colibri he has ever built. The coil weight is the same, with the same amount of turns in the coils. This provides more output, more dynamics, better staging and 40db separation between channels. The cantilever is 4 mm; a bit longer than the other Colibri models, again for better dynamics and bass response. This cartridge has an unique high output: 1,1mV.

All models are treated with the Stradivarius violin lacquer, which has a drying time of 2
